CEO Interview on Optiscan Website

Optiscan is pleased to announce the release on its website (www.optiscan.com) of an interview with Executive Chairman, Angus Holt.

The interview provides an overview of the company, its technology and current activities as well as the outlook for the coming year.

We trust this will provide a useful profile of the company to both existing and new shareholders.

About Optiscan

Optiscan is a global leader in microscopic imaging technologies for medical markets. Optiscan's unique and patented technologies enable high-powered microscopes to be miniaturised and used inside the body. The technology enables microscopic imaging of up to 1000 times magnification to be achieved. Doctors can use the technology to instantly see cellular level details of tissue without the requirement to surgically remove tissue (biopsy).
